Claim Rejections - 35 USC § 112

Claims 1-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 15, last line, it is not clear which element is being referred to by "its" and it is not clear what "associated planar portion" the applicant is referring to. In claim 2, line 3 and throughout the rest of the claims, "said planar portion" should apparently be "said at least one planar portion". In claim 2, line 4 and throughout the rest of the claims, "said one planar side" should apparently be "said at least one planar side". In claim 15, last line, it is not clear whether the planar portion is the same as the planar portion defined in claim 1. In claims 16 and 29, line 2, "that shaped" is awkward and confusing. In claims 23 and 36, line 1, it is not clear which free edge the applicant is referring to. In claims 24 and 28, last line, it is not clear which element is being referred to by "its". In claim 28, last line, it is not clear whether the planar portion is the same as the planar portion defined in claim 24. In claim 39, line 2, "first second" is awkward and confusing.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3 and 15-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Partridge (U.S. Patent No. 1,729,961).

Art Unit: 3611

Partridge shows in figures 1-5 a display comprising a polyhedron (10), a backing (11), first and second recesses (12), and first and second flanges (20,21) which are bent more than 90 degrees. In regard to claim 3, as broadly defined, the planar portion of the backing is considered to "conform" to the dimensions of the one planar side. In regard to claim 15, the flange is considered to be bent inwardly about 180 degrees. In regard to claim 17, the recesses (12) are considered to extend from one end to another end and one of the ends is considered to be the top and the other end is considered to be the bottom. In regard to claim 18, as defined, the recesses are considered to be L-shaped. In regard to claim 21, the upper portion of the recesses (12) are arcuate. In regard to claim 23, the free edge of the flanges shown by Partridge would create some bias.

Claims 24 and 39 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 4-14,25-38, and 40-41 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
